System Description

The OrangeHRM System is a web based manages employee photos. Employees can add or change their own photos and Human Resources can add or change everyone's photos. The system produces lists of photos by different selection criteria. Its photos will be used by many other systems in the company. The photos are stored in a configurable file structure and the photo location is pointed to by a file system.   This release only includes employee photos and name and address and social security information and not any of the other information planned for later.
